

Please don't take away our K-LOVE radio. This is a national radio signal that we are so lucky to receive. There are many people in this region that enjoy the Contemporary Christian music and have no other access. So many people use this as a resource to local and national events, as well as a link to tie the communities together, both locally and nationally. They provide news not heard elsewhere and many local people financially support this station. The fact that it is listener supported should say enough!
